

Khagendra Luitel

AI / Machine Learning | Data Science | Cybersecurity

Sunsari, Nepal | +977-9827060306 | anjalluitel3@gmail.com | [linkedin.com/in/khagendra-luitel-321560327](https://www.linkedin.com/in/khagendra-luitel-321560327) | github.com/hacker-194

CAREER OBJECTIVE

Computer Science student specializing in Artificial Intelligence, Machine Learning, and Cybersecurity. Proficient in Python, NumPy, and Pandas for data analysis and model experimentation. Completed a 3-month Data Science internship and now exploring Generative AI and Agentic AI. Seeking an AI/ML internship to apply technical skills and contribute to real-world projects with measurable impact.

EDUCATION

Bachelor of Computer Science: - Madhan Bhandari Memorial Academy Nepal, Urlabari

Expected Graduation: 2026

Relevant Coursework: Data Analysis & Visualization, Machine Learning, Artificial Intelligence, Probability & Statistics, Data Structures & Algorithms, Research Methodology

EXPERIENCE

Data Science Intern: - Cloud Nepal Web | May – July 2026 (3 months)

- Completed a 3-month internship training program as a Data Science Intern at Cloud Nepal Web.
- Applied Python, Pandas, and machine learning to data cleaning, analysis, and model-building tasks.

TECHNICAL SKILLS

Programming Languages:

Python, PostgreSQL

Libraries & Frameworks:

NumPy, Pandas, Scikit-learn, XGBoost, PyTorch

Tools & Automation:

n8n, FastAPI (learning), Git, GitHub

Generative AI:

GenAI, Agentic AI (learning)

Operating Systems:

Windows, Linux

Other:

Data Cleaning, Exploratory Data Analysis (EDA), Research & Documentation

PROJECTS

FastAPI Insurance Prediction API: - FastAPI, Scikit-learn, Python

- Built a REST API to serve an insurance premium prediction model using FastAPI and Scikit-learn.
- Integrated ML model inference with API endpoints for real-time predictions.

HR Data Analysis: - Python, Pandas, Matplotlib

- Conducted exploratory data analysis on HR datasets to uncover trends in employee attrition and performance.
- Produced visualisations and summary statistics to support data-driven HR decisions.

Invoice Intelligence ML Project: - Python, SQL, Pandas, Scikit-learn, Seaborn

- Analyzed vendor invoice data from a SQL database, using correlation analysis and visualisations to study how quantity, freight cost, and invoice value relate.
- Engineered a freight-per-unit feature and compared Linear Regression, Decision Tree, and Random Forest models for freight cost prediction using R^2 , MAE, and RMSE.

CERTIFICATIONS

Introduction to Cybersecurity	Cisco Networking Academy
Foundation Level Threat Intelligence Analyst	arcX

LEADERSHIP & ACTIVITIES

-
- Operations Lead:** - CFC Koshi | 2026 – Present
- Coordinating operations and logistics for a student-led community organization.
 - Managing team collaboration, scheduling, and event execution.

INTERESTS

Machine Learning • Cybersecurity • Data Science • AI for Social Good • Research & Open Source • Generative & Agentic AI
